| <b>SPECIFICATION TEXT</b>                | Vegetable preparation machine with leaning design and full moon feed cylinder, made to process 7 kg/minute or 50-700 portions/day. Machine has aluminium pusher plate with aluminium handle and a tube feeder of 56 mm in diameter. Three litre feed cylinder. Cutting tools are made of stainless steel/aluminium/acetal with removable knives/plates and are 185 mm in diameter. Motor rotate the cutting blade clockwise and direct without intermediate belts. |                   |                 |                       |                       |
| <b>FUNCTION</b>                          | Machine for slicing, dicing, shredding, grating and cutting julienne. Processes fruit, vegetables, dry bread, cheese, nuts, mushrooms, etc.                                                                                                                                                                                                                                                                                                                        |                   |                 |                       |                       |
| <b>CAPACITY</b>                          | Up to 700 portions/day and up to 7 kg/minute.<br>3 liter feed cylinder, 56 mm tube feeder for elongated products.                                                                                                                                                                                                                                                                                                                                                  |                   |                 |                       |                       |
